

Volunteer Spotlight

Meet Gregory Friesen

Gregory M Friesen FAIA, a Jazz 93.5 Board member since June 2019, is the Principal Architect for CSNA Architects in Colorado Springs and Austin, Texas. CSNA is currently working on historic renovation projects in three national historic districts in Colorado and Minnesota; two middle schools; a performing arts center for a private boarding school; a Benedictine monastery; the National Museum of WWII Aviation; and some other things.

“The practice of architecture involves working with rigid structures and the search for ways to be playful while doing so. What appeals to me about KCME radio is that if I want something structured and cerebral, I can listen to 88.7 Classical, but if I want something more loose and playful, I can listen to 93.5 Jazz.”
